

## DE-OIL-IT

**DE-OIL-IT:** The World's Best Oil Spill Eliminator and Degreaser

# DE-OIL-IT®

**DE-OIL-IT** is: <sup>1</sup>Water-Based • No Flash Point • Non Flammable • No Enzymes • No Microbes • Non Detergent • Non Phosphate • Non-Toxic • Non-Corrosive • Harmless to Plant Life • Harmless to Animal Life • Harmless to Aquatic Life • Harmless to the Water Column

**DE-OIL-IT** is a product of Green World Products, LLC, of Florida USA, which until 2 year ago, when it went into distribution was under intense testing for over 13 years.

What makes **DE-OIL-IT** unique and has made some environmentalists call it today's answer to the world's petroleum waste problems is the ability to disarm the toxic molecules contained in petroleum waste. Ordinarily, these toxic molecules destroy bacterial that occur in nature, once they come in contact with them and consequently slow down the natural process of degradation for decades.

However, when **DE-OIL-IT** is applied to grease, fuel, and oil spills, these toxic molecules are disarmed, rendering them to be no longer bio-available and the natural bacteria are allowed to digest the hydrocarbons completely and very quickly.

The residue is an inert form of air, water, and carbon (basically just ordinary dirt), which can then be safely returned back to the ecosystem. Nothing short of sensational, DE-OIL-IT is not harmful to the water column, plants, or marine life. DE-OIL-IT is non-toxic and completely biodegradable.
